Intelligent LED Driver (Constant Voltage)

- The housing is made from V0 flame retardant PC materials from SAMSUNG/COVESTRO.
- The clamshell design and screwless type for strain-relief. The design of dismountable end cap allows you to adjust the length of housing depending on your needs.
- Change the DALI address, PWM frequency and other parameters via the APP.
- Set the DALI group and scene in the advanced DALI template via the APP.
- With soft-on and fade-in dimming function, enhancing your visual comfort.
- The whole dimming process is flicker-free with high frequency exemption level.
- T-PWM™ super deep dimming technology, 0.01% dimming depth.
- Comply with the EU's ErP Directive, networked standby<0.5W.
- Overheat, over voltage, overload, short circuit protection and automatic recovery.
- Normal service life can reach 100,000 hours.
- 5-year warranty (Rubycon capacitor).

Technical Specs

Model			LM-240-24-G1D2	
Features	Output Type		Constant voltage	
	Dimming Interface		DALI-2 DT6, PUSH DIM	
	Output Feature		Isolation	
	Protection Grade		IP20	
	Insulation Grade		Class II (Suitable for class I/ II /III light fixtures)	
OUTPUT	Output Voltage		24Vdc	
	Output Voltage Range		24Vdc±0.5Vdc	
	Output Current		Max. 10A	
	Output Power		Max. 240W	
	Dimming Range		0~100%, down to 0.01%	
	Ripple(maximum)		200mVp-p	
	Voltage Accuracy		±5%	
	PWM Frequency		3600Hz (Default) / (NFC setting range 300-22000Hz)	
INPUT	DC Voltage Range		200-250Vdc	
	AC Voltage Range		220-240Vac	
	EoFv		99.6%	
	Input Voltage		220-240Vac	
	Frequency		50/60Hz	
	Input Current		Max. 1.18A/230Vac	
	Power Factor		PF>0.99/230Vac, at full load	
	THD		THD≤5%@230Vac, at full load	
	Efficiency (Typ.)		94%	
	Inrush Current		Cold start 55A(Test twidth=1200us tested under 50% Ipeak)/230Vac	
	Anti Surge		L-N: 2KV	
	Leakage Current		Max. 0.5mA	
ENVIRONMENT	Working Temperature		ta: -20 ~ 45°C tc: 86°C	
	Working Humidity		20 ~ 95%RH, non-condensing	
	Storage Temperature/Humidity		-40 ~ 80°C/10~95%RH	
	Temperature Coefficient		±0.03%/°C(0-50°C)	
	Vibration		10~500Hz, 2G 12min/1cycle, 72 min for X, Y and Z axes respectively	
PROTECTION	Overload Protection		Shut down the output when rated power≥102%, auto recovers	
	Overheat Protection		Intelligently adjust or turn off the output current if the PCB temperature ≥110°C, and recover automatically	
	Overvoltage Protection		Shut down the output when voltage≥28V, and recover automatically	
	Short Circuit Protection		Enter hiccup mode if short circuit occurs, and recover automatically	
SAFETY & EMC	Withstand Voltage		I/P-O/P: 3750Vac	
	Insulation Resistance		I/P-O/P: 100MΩ/500VDC/25°C/70%RH

	EMC Immunity		EN61000-4-2,3,4,5,6,8,11, EN61547	
ErP	Power Consumption		Networked standby	<0.5W (After shutdown by command)
			No-load power consumption	<0.5W (When the lamp is not connected)
	Flicker/Stroboscopic Effect		IEEE 1789	Meet IEEE 1789 standard/High frequency exemption level
			CIE SVM	Pst LM≤1.0, SVM≤0.4
	DF		Phase factor	DF≥0.9
OTHERS	Weight(N.W.)		555g±10g	
	Dimensions		380×49.5×30mm(L×W×H)	

The driver is suitable for connecting resistor current-limiting LED fixture (e.g. LED strip). The inrush current will be dozens of times increased if connecting built-in constant current IC current-limiting LED fixtures, the driver will activate the overloaded protection (hiccups flickering). When you order, please remark controlling the constant current LED fixture (e.g. MR16 lamp, underground light, LED wall washer, constant current LED strip, etc.), so that we can prepare them with special procedures.

Dimming: 0~100%

✻ Dimming is non-effective on the condition of Vdc input.

✻ Dimming interface priority: First DALI, next Push DIM.

Push DIM

Reset switch

- On/off control: Short press.
- Stepless dimming: Long press.
- With every other long press, the brightness goes to the opposite direction.
- Dimming memory: Brightness will be the same as previously adjusted when turning on again.

## Protective Housing Application Diagram
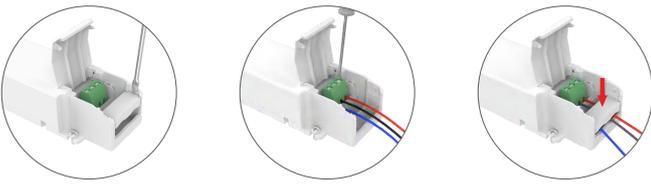

Use a screwdriver to pry up the protective housing at the edge of the wire fixing board. Then connect to the wires as the diagram shows and press down the wire fixing board.

Press down the back side of the protective housing and move it from side to side to remove it.

Installation Precautions

≥15cm
≥15cm
≥15cm
≥15cm
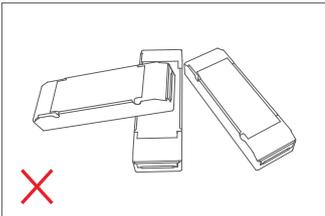

≥15cm

Please do not stack the products. The distance between two products should be ≥15cm so as not to affect heat dissipation and the lifespan of the products.
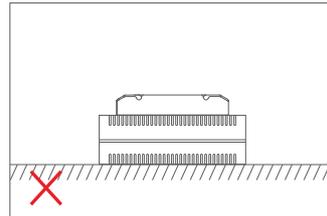

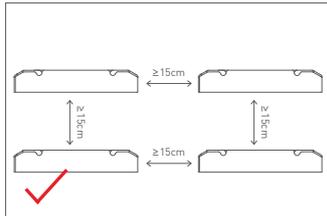

Please not place the products on LED drivers. The distance between the product and the driver should be ≥15cm so as not to affect heat dissipation and shorten the lifespan of the products.
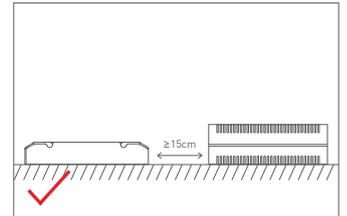

Note: The temperature within the installation area should be within the working temperature range of the products. Please do not install products inside LED fixtures to avoid temperature exceeding the working temperature that may affect the product lifetime.

Use the NFC Lighting APP

Scan the QR code below with your mobile phone and follow the prompts to complete the APP installation (According to performance requirements, you need to use a NFC-capable Android phone, or an iphone 8 and later that are compatible with iOS 13 or higher).

✱ **Before you begin setting the parameters of the driver, please make sure the driver is powered off.**

Read/Write the LED driver

Use your NFC-capable phone to read LED driver data, then edit the parameters and they can be directly written to the driver.

1. Read the LED driver

On the APP home page, click【Read/Write LED driver】, then keep the programmer's sensing area close to the NFC logo of the driver to read the driver parameters.

NFC logo of the driver
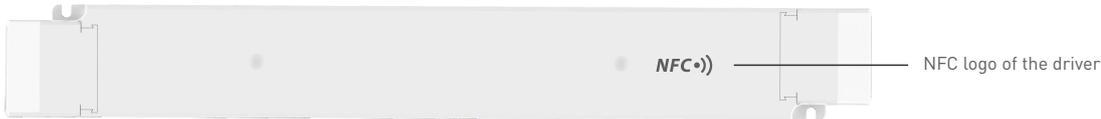

2. Edit the parameters

Click【Parameter settings】to edit the advanced parameters, like DALI address, PWM frequency, dimming curve, advanced DALI template, etc.

3. Write to the driver

After completing the parameter settings, click 【Write】 in the upper right corner, and keep the programmer's sensing area close to the NFC logo of the driver, so the parameters can be written to the driver.
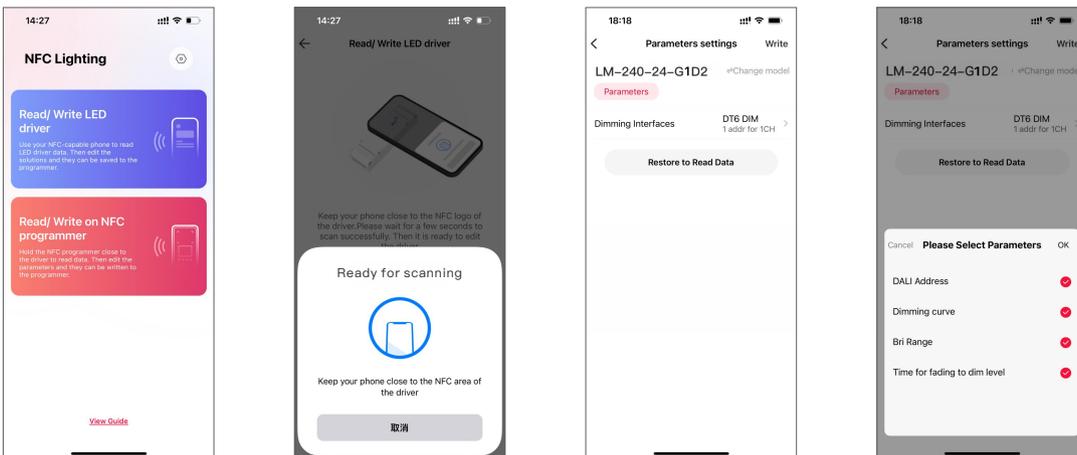

Advanced DALI template

Integrate the functions of the DALI lighting system, edit the DALI group and lighting effects for scenes, then save them in the advanced template to achieve lighting programming.

Setup page (for Read/Write LED driver) : Go to App home page — 【 ◎ 】 icon in the top right — 【DALI template on pnone】.

Transportation and Storage

1. Transportation

Products can be shipped via vehicles, boats and planes.

During transportation, products should be protected from rain and sun. Please avoid severe shock and vibration during the loading and unloading process.

2. Storage

The storage conditions should comply with the Class I Environmental Standards. The products that have been stored for more than six months are recommended to be re-inspected and can be used only after they have been qualified.

Attentions

- Products shall be installed by qualified professionals.
- LTECH products are and not lightningproof non-waterproof (special models excepted). Please avoid the sun and rain. When installed outdoors, please ensure they are mounted in a water proof enclosure or in an area equipped with lightning protection devices.
- Good heat dissipation will prolong the working life of products. Please ensure good ventilation.
- Please check if the working voltage used complies with the parameter requirements of products.
- The diameter of wire used must be able to load the light fixtures you connect and ensure the firm wiring.
- Before you power on products, please make sure all the wiring is correct in case of incorrect connection that causes damage to light fixtures.
- If a fault occurs, please do not attempt to fix products by yourself. If you have any question, please contact your suppliers.

＊ This manual is subject to changes without further notice. Product functions depend on the goods. Please feel free to contact our official distributors if you have any question.

Warranty Agreement

- Warranty periods from the date of delivery: 5 years.
- Free repair or replacement services for quality problems are provided within warranty periods.

Warranty exclusions below:
- Beyond warranty periods.
- Any artificial damage caused by high voltage, overload, or improper operations.
- Products with severe physical damage.
- Damage caused by natural disasters and force majeure.
- Warranty labels and barcodes have been damaged.
- No any contract signed by LTECH.

1. Repair or replacement provided is the only remedy for customers. LTECH is not liable for any incidental or consequential damage unless it is within the law.
2. LTECH has the right to amend or adjust the terms of this warranty, and release in written form shall prevail.
